C36

**Instruction: Delete any examples in grey italic text that are not relevant/applicable to the study once the programming specification has been finalized**

**Section A: Data Source Selection**

| Data source | Population Subset | Version |
|---|---|---|
| COTA | *NSCLC EDM (t_enh_advancednsclc_&rfrsh) where rfrsh is the data version* | *2025m01 (latest version aligned with progression data)* |
| | | |
| | | |

**Section B: Define Important Dates**

| Date | Label | Definition | Additional Notes | QC Reviewed (Initials + Date) | Date Modified (Initials + Date) |
|---|---|---|---|---|---|
| INIT | Initial LBCL diagnosis date | disease_initial_diagnosis/date_initial_diagnosis | | DDE 08dec25 | |
| INDEX | Index date | If COHORT='Overall LBCL' then INDEX = INIT;<br><br>else if COHORT='L1+ treated LBCL' then INDEX=LOT1SD (L1 start date);<br><br>else if COHORT='L2+ treated LBCL' then INDEX=LOT2SD (L2 start date);<br><br>else if COHORT='L3+ treated LBCL' then INDEX=LOT3SD (L3 start date);<br><br>else if COHORT='L4+ treated LBCL' then INDEX=LOT4SD (L4 start date); | COHORT, LOT1SD-LOT4SD variables defined in 4.StudyPop | DDE 08dec25 | |
| MAXINDEX | Maximum potential index date | Data cut off date | A single value across all patients and all cohorts | DDE16JAN26 | |
| MININDEX | Minimum potential index date within cohort | Minimum(INDEX) acrosss all patients within a cohort | NOT per patient, but for the whole cohort - all patients will have the same date within the same cohort. This variable may be used to quickly answer stakeholder questions. | DDE 08dec25 | |
| MINAVAILDATE | Minimum date from all the tables | Earliest available date with patient clinical history across all tables | | DDE16JAN26 | |
| LSTACTDT | Date of last structured activity | Maximum of INIT + any _timedelta variables across all tables | Important to define separately from FUED since it will be used as censoring date in overall survival definition.<br><br>Refer to COTA R package for implementation, see function id_last_alive_timedelta() | DDE16JAN26 | |
| | | Minimum of: | | | |

C17 Earliest of COTA-defined censor date or last contact with a healthcare provider

| | | | | | | |
|---|---|---|---|---|---|---|
| CENSDT | Earliest of COTA-defined censor date or last contact with a healthcare provider | Minimum of:<br>Date of 2nd malignancy diagnosis or cancer history recurrence (INIT + patient/censored_timedelta);<br>Date of last contact with a healthcare provider (INIT + patient/contacted_timedelta); | Important to define separately from FUED since it will be used as censoring date for all time-to-event endpoints (except overall survival) | DDE16JAN26 | | |
| FUED | End of follow-up date | Minimum of:<br>Date of death (INIT + patient/dod_timedelta);<br>Date of 2nd malignancy diagnosis or cancer history recurrence (INIT + patient/censored_timedelta);<br>Date of last contact (INIT + patient/contacted_timedelta);<br>Date of last structured activity (LSTACTDT);<br>Data cut date (MAXINDEX) | | not sure we need to add last structured activity as it's the max of all dates and we want here to select the min | | |

## Section C: Define Study Time Periods

| Time Period | Label | Definition | Additional Notes | QC Reviewed (Initials + Date) | Date Modified (Initials + Date) |
|---|---|---|---|---|---|
| STUDY_PD | Full study period | [MINAVAILDATE through MAXINDEX] | | DDE 08dec25 | |
| PRE_INT | Any time prior index date, including index date | [MINAVAILDATE through INDEX] | Inclusive of index date | DDE 04dec25 | |
| FU | Follow-up period | [INDEX + 1 through FUED] | | DDE 04dec25 | |
| ASSESS_BIO | Biomaker assessment period | [MINAVAILDATE through INDEX + 14 days] | | DDE 08dec25 | |
| ASSESS_ECOG | ECOG assessment period | [INDEX - 30 through INDEX + 7] | | DDE 08dec25 | |
| ASSESS_BSYMPT | B symptoms assessment period | [MINAVAILDATE through INDEX + 30] | *to check how many pts have baseline assessment more than 30 days before diagnoses and in this case, max elapsed time* | DDE 08dec25 | |
| ASSESS_BULKY | Bulky disease assessment period | [INIT - 30 through INIT + 30] | | DDE 08dec25 | |

## Section D: Source Data Preparation

***Instruction: Section C should ONLY be used to document decisions to the source data before the analytic file build. If decisions apply to a variable in the analytic file, document in the appropriate variable definition. Rows should be cumulative, do not delete or insert rows as it will alter the row number (#)***

| # | Source Table/Variable | Situation Requiring Resolution | Action | Reasoning / Comments | QC Reviewed (Initials + Date) | Date Modified (Initials + Date) |
|---|---|---|---|---|---|---|
| 1 | Days to months conversion | Assuming 30.4375 day per month | 3 months = 91 days, 6 months=183 days, 9 months=274 days, 25 months=365 days | | | |
| 2 | Dates (all tables) | ? | | | | |
